---

## Education

### University of Toronto

➤ BSc. Computer Science

2015 - 2019

---

## Personal Projects

### BabyBuddy

HTML, CSS, JavaScript (AngularJS)

- A simplified informational resource to guide women through the months of pregnancy.
- Includes beneficial convenient tips for pregnant women to assist them during pregnancy.
- Published at <http://ivanshen.me/babybuddy>

### SwapWithMe

HTML, CSS, JavaScript, MongoDB (Meteor)

- A textbook exchange platform to simplify the process of searching for courseware.
- Allows for users to filter specific search results such as buying or selling intentions, search tags, and availability.
- Published at <http://swapwithme.meteor.com/>

### Help Me Up – Brain Hacktivity

Java, Python, MongoDB

- A patient monitoring Android app for patients with dementia using a neural network that alerts caregivers of a patient's fall and circumstances.
- Designed and implemented emergency alerting, patient visibility, patient coordinate location, and alarm features within the application.
- Read more at <http://devpost.com/software/helpmeup>

### Se7en

HTML, CSS, JavaScript (AngularJS)

- A fun and addicting web game to test the speed your arithmetic!
- Published at <http://ivanshen.me/Se7en/>

### Who Are You, Really?

Java

- A learning styles quiz that breaks down a user's best learning styles in percentages and displays the results in multiple graphs.
- Allows the option of user customizability.
- Available at <https://github.com/ivanshen/Who-Are-You-Really>

---

## Skills

Preferred: Java, Python, HTML, CSS, Javascript, and Git

Some Experience with: Android development, MongoDB

Frameworks: Bootstrap, AngularJS, Meteor

---
